

BUSINESS PLAN

■10 Lakh Premium Laundry + Pickup/Delivery + B2B Linen Service
Hyderabad, Telangana | Prepared as a planning model

Executive Summary

This business plan proposes a neighborhood-focused laundry processing and doorstep-delivery operation in Hyderabad. The model combines wash-and-fold, wash-and-iron, steam ironing, outsourced dry cleaning, household subscriptions, and B2B linen contracts. The objective is to build recurring revenue while keeping the initial fixed-cost footprint modest.

Core strategy: do not spend the full ■10 lakh on an expensive storefront or interiors. Invest primarily in productive equipment, delivery capability, customer acquisition, and working capital.

Important: all financial figures in this document are illustrative planning assumptions, not guaranteed results. Local rent, equipment quotations, utility costs, labor costs, pricing, taxes, and customer demand should be validated before investment.

1. Business Concept

Positioning: a professional, subscription-led laundry service with scheduled doorstep pickup and delivery.

Target segment	Primary offer
IT employees	Weekly/monthly laundry subscriptions
Families	Doorstep wash, fold and ironing
PG residents	Fixed monthly laundry packages
Students	Bulk wash-and-fold packages
Airbnb/serviced apartments	Linen and towel contracts
Salons & gyms	Recurring towel/cape/workout-linen service
Small hotels/clinics	Eligible linen processing contracts

2. Services & Pricing Framework

Service	Illustrative starting price
Wash & fold	■60–■70/kg
Wash + iron	■80–■100/kg
Premium wash	■90–■120/kg
Shirt ironing	■10–■15
Pant ironing	■15–■20
Bedsheet	■60–■100
Blanket	■150–■300
Dry cleaning	Outsource initially; add margin

Prices should be benchmarked against competitors in the selected Hyderabad neighborhood before launch.

3. Subscription Packages

Package	Monthly price	Illustrative allowance
Basic	■799	10 kg; wash & fold
Standard	■1,299	18 kg; wash & fold + selected ironing
Premium	■1,999	30 kg; wash + fold + ironing allowance
Family	■2,999	45–50 kg; wash + iron + priority service

4. ■10 Lakh Startup Budget

Investment item	Budget
Commercial washing machines	■2,00,000
Semi-commercial dryer	■80,000
Steam iron/pressing equipment	■45,000
Tables, racks, baskets, weighing scale	■35,000
Water tank/plumbing/electrical setup	■30,000
Shop deposit + initial rent	■1,00,000
Delivery scooter/bike	■90,000
Branding/signboard/interior	■45,000
Computer/POS/printer/software	■25,000
Website + WhatsApp ordering setup	■25,000
Licences/registrations/accounting etc.	■30,000
Initial packaging/materials/chemicals	■30,000
Launch marketing	■50,000
Working-capital reserve	■1,55,000
TOTAL	■10,00,000

Protect the working-capital reserve. Avoid overspending on interiors before demand is proven.

5. Location Strategy

Target a 300–500 sq. ft. ground-floor unit with water, drainage, electrical capacity, two-wheeler access and parking. A planning target is approximately ■15,000–■25,000 monthly rent.

Areas to investigate: Narsingi, Manikonda, Puppalaguda, Tellapur, Osman Nagar, Gopanpally, Madhapur, Ayyappa Society, Kondapur, Hafeezpet, Miyapur, Kukatpally, Pragathi Nagar, Bachupally, Dilsukhnagar and LB Nagar. These are candidate areas for field validation—not a ranking.

6. B2B Revenue Strategy

Prioritize recurring contracts with PGs, gyms, salons, Airbnb/serviced apartments and small hospitality operators. Example planning scenario: 10 B2B customers at an average ■15,000/month would represent ■1.5 lakh monthly revenue. Actual contract values will vary substantially by volume and service scope.

7. Illustrative 12-Month Revenue Plan

Month	Target revenue
1	■52,000
2	■69,000
3	■96,000
4	■1.19 lakh
5	■1.42 lakh
6	■1.58 lakh
7	■1.72 lakh
8	■1.87 lakh
9	■2.01 lakh
10	■2.16 lakh
11	■2.30 lakh
12	■2.53 lakh
Illustrative year-1 total	≈ ■18.94 lakh

These are management-planning targets rather than forecasts or guarantees.

8. Illustrative Monthly Operating Cost

Expense	Approx. monthly
Rent	■20,000
Staff	■35,000
Electricity/water	■10,000
Detergent/chemicals	■8,000
Delivery/fuel	■8,000
Packaging	■5,000
Marketing	■7,000
Software/phone/accounting	■3,000
Maintenance/misc.	■5,000
Approx. total	■1.01 lakh

9. Break-Even & Financial Interpretation

A planning target is to reach operating break-even around ■80,000–■1,00,000 monthly revenue. Under the illustrative year-one revenue and cost assumptions used in the original plan, revenue is approximately ■18.94 lakh and the estimated operating expenses are approximately ■9.92 lakh, leaving roughly ■9.01 lakh before taxes, depreciation, financing costs and owner drawings.

This residual should not be treated as guaranteed profit. Actual results can differ materially due to customer acquisition, utilization, rent, labor, equipment downtime, delivery density, rework, discounts and pricing.

10. Marketing & Customer Acquisition

Launch through Google Business Profile, WhatsApp Business, a simple website, apartment/community outreach, referral credits and direct B2B sales. Apartment partnerships can be particularly useful because pickup density reduces delivery cost per order.

Suggested customer milestones: Month 1: 50 paying customers; Month 2: 100; Month 3: 150–200; Month 6: 300–400; Month 12: 500+ active customers. These are operating targets, not guaranteed outcomes.

11. Operations & Quality Control

Use a documented workflow: pickup → photograph/identify sensitive items → weigh → classify → wash → dry → iron/fold → quality check → package → deliver → payment/feedback. Separate whites, colors, delicates, towels and bedsheets. Use order numbers and itemized billing.

Initially outsource specialist dry cleaning rather than investing heavily in specialist equipment. Add in-house capabilities only after consistent demand is established.

12. Technology

Start with WhatsApp Business, Google Business Profile, payment QR, simple website and lightweight order-management software. An expensive mobile app is unnecessary at launch.

13. Risks & Controls

Risk	Control
High rent	Choose a small processing unit in a dense residential catchment
Slow customer acquisition	Validate demand before major equipment expansion
Damaged/missing garments	Photograph high-value items; use order tracking and QC
Delivery costs	Cluster pickups by apartment/community and schedule
Equipment downtime	Maintenance plan and contingency budget
Price competition	Differentiate through subscriptions, reliability and B2B service
Working-capital shortage	Protect the ₹1.55 lakh reserve

14. 90-Day Launch Roadmap

Weeks 1–2: compare three candidate neighborhoods, map competitors, check rents/water/drainage, interview prospective customers and obtain equipment quotations.

Weeks 3–4: finalize premises, registrations/licensing, equipment installation, branding, Google profile, WhatsApp Business and initial staffing.

Month 2: launch with a focused catchment and target 50–100 customers.

Month 3: begin structured B2B outreach and target approximately ₹1 lakh monthly revenue.

15. Expansion Roadmap

Once the first unit reaches stable utilization and positive operating cash flow, consider additional washing capacity, a second delivery vehicle, another pickup point, in-house dry cleaning, shoe/carpet/curtain services and a second processing location. Expansion should follow demonstrated demand rather than precede it.

16. Government Support & Compliance Note

Potential financing/incentive routes can include Udyam registration, eligible MSME programs and PMEGP, subject to current eligibility and scheme rules. Telangana incentive eligibility can depend on location and enterprise

characteristics; do not count a subsidy as guaranteed funding until eligibility is confirmed with the relevant authority.

Before launch, obtain professional advice on the exact municipal, Shops & Establishments, GST, labor, pollution/wastewater, fire-safety, trade-license and other requirements applicable to the selected premises and activities.

17. Recommended ■10 Lakh Capital Structure

Category	Amount
Equipment/setup	■4.65 lakh
Premises/deposit	■1.00 lakh
Delivery vehicle	■0.90 lakh
Branding/technology/launch	■1.00 lakh
Working capital	■1.55 lakh
Contingency/operational buffer	■0.90 lakh
TOTAL	■10.00 lakh

Bottom Line

The proposed ■10 lakh model is designed around recurring household subscriptions, dense pickup routes and B2B contracts rather than a large retail storefront. The next investment decision should be based on a Hyderabad neighborhood-level validation of rent, competition, water/electricity availability, customer density, local pricing and B2B demand.

Prepared from the business plan discussed in this conversation. Financial figures are illustrative and should be independently validated before investment or financing decisions.
